-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Art Unit: 2831

1. This application is in condition for allowance except for the following formal matters:

Oath/Declaration

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because Non-initialed and/or non-dated alterations have been made to the oath or declaration. See 37 CFR 1.52(c).

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the receptacle contacts and line terminals recited in claims 1 and 22, feed thru terminals recited in claim 2, and a fault detector recited in claim 3 and must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate

Art Unit: 2831

figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "46" has been used to designate both rotor and a cam and reference character "48" has been used to designate both a torsion spring assembly and rotor, see page 6 of the specification. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

5. Claims 13-14 are objected to because of the following informalities:

In claim 13 line 1, " GFCI" should be spelled out completely.

In claim 14 line 2, " AFCI" should be spelled out completely.

Appropriate correction is required.

Allowable Subject Matter

6. Claims 1-25 would be allowable if overcome the drawings objections , set forth in this Office action.

7. The following is a statement of reasons for the indication of allowable subject matter: The primary reason for the indication of the allowability of claims 1-25 are the inclusion therein, in combination as currently claimed, of the limitation of

a protection device comprising: a mis- wiring sensor coupled to the line terminals, the mis- wiring sensor being configured to sense the proper wiring condition and actuate the protective shutter in response thereto.(for claims 1-21), and a protection device comprising: a mis- wiring sensor coupled to the line terminals and the cam member, the mis-wiring sensor being configured to sense the proper wiring condition and enable rotation of the cam member in response thereto (for claims 22-25).

The previously listed limitation is neither disclosed nor taught by the prior art of record, alone or in combination.

Art Unit: 2831

Other prior art cited

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Glazowski, Nattel, Duran, Szilagyi and Gorman disclose a receptacle similar to applicant's claimed invention.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
